*CPT code 90756 was released on July 1, 2017 for implementation on January 1, 2018. Payers may implement the code based on beneficiaries' needs any time after the code's release. The CPT Editorial Panel allotted a 6-month period to allow payers adequate time to prepare their systems; however, processing periods for individual payers may accommodate a more abbreviated timeframe. Effective January 1, 2017, redefined CPT codes 90656, 90657, 90658, 90674, 90685, 90686, 90687, and 90688 reflect dosage amounts, in lieu of age indications. Information on CVX and CPT codes may be found at CDC's website: www2a.cdc.gov/vaccines/iis/iisstandards/vaccines.asp?rpt=cpt.
